Subject Index of Volume 68

Absorption spectra
absorption spectra and photoisomerization kinetics of photochromic pyrryl fulgides, 309
Absorption–fluorescence gain
direct observation of the $2.^1 Ag^-$ electronic state of carotenoid molecules by consecutive two-photon absorption spectroscopy, 59
Actinometer
photoelectrochemical (PEC) cell: riboflavin–Na_2EDTA system as an actinometer, 395
Alkanes
insertion of phenylchlorocarbenes in the C–H bonds of alkanes: measurement of the rate constants by laser flash photolysis, 97
Aminoanthraquinones
non-radiative processes from the S_1 state of aminoanthraquinones: a steady-state and time-resolved study, 169
Aminodiazines
triplet–triplet absorption and phosphorescence of aminodiazines, 35
Ammonia
nitrogen photoreduction by vanadium(III)-substituted hydrous ferric oxide, 131
photocatalytic reduction of molecular nitrogen to ammonia catalysed by dinitrogen complexes of ruthenium aminopolycarboxylates, 137
Anthracene
photostabilization mechanisms of hindered amine light stabilizers: interaction of singlet and triplet anthracene with piperidene model compounds, 239
Argon
optical spectroscopy of the aryl cation
substituent effects on the production and electronic spectra of intermediates in the photodecomposition of ArN_2^+; optical characterization of the reaction $Ar^+ + N_2 \rightarrow ArN_2^+$, 85
Aryl cations
optical spectroscopy of the aryl cation
substituent effects on the production and electronic spectra of intermediates in the photodecomposition of ArN_2^+; optical characterization of the reaction $Ar^+ + N_2 \rightarrow ArN_2^+$, 85
Azulene
photochemical reaction between uranyl nitrate and azulene, 279

Benzoquinone
photoreactivity of 4-chlorophenol in aqueous solution, 363
Biphenyl derivatives
studies of the triplet state of biphenyl derivatives by nanosecond pulse radiolysis, 337
2,2′-Bipyridyl
photoexcitation of potassium octacyanomolybdate(IV) with 1,10-phenanthroline and 2,2′-bipyridyl: kinetics and mechanism of the reaction in acidic medium, 147

Carboxylic acid
proton-transfer-induced radiationless deactivation in 2,4,6-triarylpyridines, 319
Carotenoid
direct observation of the 2.1 A_g-electronic state of carotenoid molecules by consecutive two-photon absorption spectroscopy, 59
Chemiluminescence
dye-sensitized chemiluminescence of luminol and related cyclic hydrazides, 191
Chlorocuprate(I) complexes
time resolved studies of photoinduced electron transfer in aqueous solutions of chloro- and cyanocuprate(I) complexes, 155
4-Chlorophenol
photoreactivity of 4-chlorophenol in aqueous solutions, 363
Chromophores
spectroscopic properties and photodi-

merisation of water soluble poly(vinyl alcohol) modified with pendant (E)-2-[*p*-formylstyryl]-3,4-dimethyl-thiazolium methyl sulphate groups: polymer and model chromophore studies, 227
Coumarin
energy transfer excitation in an N_2-laser-pumped coumarin 485-rhodamine B dye mixture through optical gain characteristics, 77
Cyanocuprate(I) complexes
time resolved studies of photoinduced electron transfer in aqueous solutions of chloro- and cyanocuprate(I) complexes, 155
Cyclic hydrazides
dye-sensitized chemiluminescence of luminol and related cyclic hydrazides, 191

DBPI
fluorescence quenching of *N*,*N*-bis(2,5-di-*tert*-butylphenyl)-3,4:9,10-perylene-bis(dicarboximide) (DBPI) by Co^{2+} ion, 51
Deactivation
non-radiative processes from the S_1 state of aminoanthraquinones: a steady-state and time-resolved study, 169
4,4-Diphenyl-2-cyclohexen-1-one
photochemistry of a two-carbon ortho–ortho phenyl-bridged 4,4-diphenyl-2-cyclohexen-1-one, 263
Dithiocarbamate radicals
dithiocarbamate radicals in laser flash photolysis of thiuram disulphide and dithiocarbamate anion: calculation of optical spectra, 299

Electron donors
necessity of distinguishing "n" from "π" quenchers in electron transfer studies, 165
Electron transfer
necessity of distinguishing "n" from "π" quenchers in electron transfer studies, 165
photoactivity of isopoly molybdates and tungstates: a comparison, 107
Electronic absorption
electronic absorption and fluorescence spectra of xanthene dyes in polymers, 41
Electronic spectra
optical spectroscopy on the aryl cation
substituent effects on the production and electronic spectra of intermediates in the photodecomposition of ArN_2^+; optical characterization of the reaction $Ar^+ + N_2 \rightarrow ArN_2^+$, 85
Emission spectra
hydrophobic effects on photochemical and photophysical processes
enhancement of excimer formation of hexadecyl 2-naphthoate and singlet energy transfer to hexadecyl dansyl via aggregation, 247
Energy transfer dye lasers
energy transfer excitation in an N_2-laser-pumped coumarin 485-rhodamine B dye mixture through optical gain characteristics, 77
Energy transfer excitation
energy transfer excitation in an N_2-laser-pumped coumarin 485-rhodamine B dye mixture through optical gain characteristics, 77
Environmentally sensitive compounds
high temperature UV absorption characteristics of three environmentally sensitive compounds, 353
Eosin Y
dye-sensitized chemiluminescence of luminol and related cyclic hydrazides, 191
Excimers
hydrophobic effects of photochemical and photophysical processes
enhancement of excimer formation of hexadecyl 2-naphthoate and singlet energy transfer to hexadecyl dansyl via aggregation, 247
Excited state proton transfer
proton-transfer-induced radiationless deactivation in 2,4,6-triarylpyridines, 319

Fluorescence
hydrophobic effects on photochemical and photophysical processes
enhancement of excimer formation of hexadecyl 2-naphthoate and singlet energy transfer to hexadecyl dansyl via aggregation, 247
Fluorescence decay
non-radiative processes from the S_1 state of aminoanthraquinones: a

steady-state and time resolved study, 169
Fluorescence lifetimes
viscosity independence of the ratio of fluorescence lifetimes and quantum yields of ω-substituted 4-dimethylamino-*trans*-styrenes, 185
Fluorescence quenching
fluorescence quenching of *N,N*-bis(2,5-di-*tert*-butylphenyl)-3,4:9,10-perylenebis(dicarboximide) (DBPI) by Co^{2+} ion, 51
necessity of distinguishing "n" from "π" quenchers in electron transfer studies, 165
viscosity independence of the ratio of fluorescence lifetimes and quantum yields of ω-substituted 4-dimethylamino-*trans*-styrenes, 185
Fluorescence spectra
electronic absorption and fluorescence spectra of xanthene dyes in polymers, 41
Fluorescence spectroscopy
proton-transfer-induced radiationless deactivation in 2,4,6-triarylpyridines, 319

Hindered amine light stabilizers
photostabilization mechanisms on hindered amine light stabilizers: interaction of singlet and triplet anthracene with piperidene model compounds, 239
Hydrogen peroxide
photochemical degradation of malathion in aqueous solutions, 121
photoinitiated reactions of hydrogen peroxide in the liquid phase, 1
Hydrogen transfer
photoactivity of isopoly molybdates and tungstates: a comparison, 107
Hydrophobic effects
hydrophobic effects on photochemical and photophysical processes
enhancement of excimer formation of hexadecyl 2-naphthoate and singlet energy transfer to hexadecyl dansyl via aggregation, 247

Isopoly molybdates
photoactivity of isopoly molybdates and tungstates: a comparison, 107

Kinetic fluorometry
proton-transfer-induced radiationless deactivation in 2,4,6-triarylpyridines, 319
Kinetics
photoexcitation of potassium octacyanomolybdate(IV) with 1,10-phenanthroline and 2,2′-bipyridyl: kinetics and mechanism of the reaction in acidic medium, 147

Laser flash photolysis
dithiocarbamate radicals in laser flash photolysis of thiuram disulphide and dithiocarbamate anion: calculation of optical spectra, 299
insertion of phenylchlorocarbenes in the C–H bonds of alkenes: measurement of the rate constants by laser flash photolysis, 97
laser and microsecond flash photolysis of 2-substituted anthraquinones and photochemical cross-linking of nylon 6,6 polymer, 213
Luminol
dye-sensitized chemiluminescence of luminol and related cyclic hydrazides, 191

Malathion
photochemical degradation of malathion in aqueous solutions, 121
Methylene blue
dye-sensitized chemiluminescence of luminol and related cyclic hydrazides, 191
Methylviologen
photocatalytic splitting of water, 375
Microsecond flash photolysis
laser and microsecond flash photolysis of 2-substituted anthraquinones and photochemical cross-linking of nylon 6,6 polymer, 213
spectroscopic properties and photodimerisation of water soluble poly(vinyl alcohol) modified with pendant (E)-2-[*p*-formylstyryl]-3,4-dimethyl-thiazolium methyl sulphate groups: polymer and model chromophore studies, 277

Nitrogen
nitrogen photoreduction by vanadium(III)-substituted hydrous ferric oxide, 131

optical spectroscopy of the aryl cation substituent effects on the production and electronic spectra of intermediates in the photodecomposition of ArN_2^+; optical characterization of the reaction $Ar^+ + N_2 \rightarrow ArN_2^+$, 85
photocatalytic reduction of molecular nitrogen to ammonia catalysed by dinitrogen complexes of ruthenium aminopolycarboxylates, 137
Nylon 6,6 polymer
laser and microsecond flash photolysis of 2-substituted anthraquinones and photochemical cross-linking of nylon 6,6 polymer, 213

Optical gain characteristics
energy transfer excitation in an N_2-laser-pumped coumarin 485-rhodamine B dye mixture through optical gain characteristics, 77
Optical spectroscopy
optical spectroscopy of the aryl cation substituent effects on the production and electronic spectra of intermediates in the photodecomposition of ArN_2^+; optical characterization of the reaction $Ar^+ + N_2 \rightarrow ArN_2^+$, 85
Organosulphur compounds
photochemistry of some organosulphur pesticides, 289

1,10-Phenanthroline
photoexcitation of potassium octacyanomolybdate(IV) with 1,10-phenanthroline and 2,2′-bipyridyl: kinetics and mechanism of the reaction in acidic medium, 147
Phenol
$Cr(bpy)_3^{3+}$-sensitized photo-oxidation of phenol in aqueous solution, 115
Phenylchlorocarbenes
insertion of phenylchlorocarbenes in the C–H bonds of alkanes: measurement of the rate constants by laser flash photolysis, 97
Phosphorescence
triplet–triplet absorption and phosphorescence of aminodiazines, 35
Photo-oxidation
$Cr(bpy)_3^{3+}$-sensitized photo-oxidation of phenol in aqueous solution, 115
photochemistry of some organosulphur pesticides, 289
Photoactivity
photoactivity of isopoly molybdates and tungstates: a comparison, 107
Photocatalysis
photocatalytic splitting of water, 375
Photocatalytic reduction
photocatalytic reduction of molecular nitrogen to ammonia catalysed by dinitrogen complexes of ruthenium aminopolycarboxylates, 137
Photochemical cross-linking
laser and microsecond flash photolysis of 2-substituted anthraquinones and photochemical cross-linking of nylon 6,6 polymer, 213
Photocross-linking
spectroscopic properties and photodimerisation of water soluble poly(vinyl alcohol) modified with pendant (E)-2-[*p*-formylstyryl]-3,4-dimethyl-thiazolium methyl sulphate groups: polymer and model chromophores studies, 227
Photodecomposition
optical spectroscopy of the aryl cation substituent effects of the production and electronic spectra of intermediates in the photodecomposition of ArN_2^+; optical characterization of the reaction $Ar^+ + N_2 \rightarrow ArN_2^+$, 85
wavelength-dependent photolysis of 3-vinyl-azosulphonate, 205
Photodegradation
photochemical degradation of malathion in aqueous solutions, 121
photodegradation of visible-light-absorbing organic compounds in the presence of semiconductor catalysts, 389
Photodimerization
spectroscopic properties and photodimerisation of water soluble poly(vinyl alcohol) modified with pendant (E)-2-[*p*-formylstyryl]-3,4-dimethyl-thiazolium methyl sulphate groups: polymer and model chromophore studies, 227
Photoelectrochemical cell
photoelectrochemical (PEC) cell: riboflavin–Na_2EDTA system as an actinometer, 395
Photoexcitation
photoexcitation of potassium octacyanomolybdate(IV) with 1,10-phenanthroline and 2,2′-bipyridyl: kinetics and mechanism of the reaction in acidic medium, 147

Photoinduced electron transfer
time resolved studies of photoinduced electron transfer in aqueous solutions of chloro- and cyanocuprate(I) complexes, 155
Photoinitiated reactions
photoinitiated reactions of hydrogen peroxide in the liquid phase, 1
Photolysis
photochemical reaction between uranyl nitrate and azulene, 279
photochemistry of some organosulphur pesticides, 289
photoinitiated reactions of hydrogen peroxide in the liquid phase, 1
triplet–triplet absorption and phosphorescence of aminodiazines, 85
wavelength-dependent photolysis of 3-vinyl-phenyl-azosulfonate, 205
Photoreduction
nitrogen photoreduction by vanadium(III)-substituted hydrous ferric oxide, 131
Photosensitized oxidation
photochemistry of some organosulphur pesticides, 289
Photostabilization
photostabilization mechanisms of hindered amine light stabilizers: interaction of singlet and triplet anthracene with piperidene model compounds, 239
Photoisomerization kinetics
absorption spectra and photoisomerization kinetics of photochromic pyrryl fulgides, 309
Piperidene model compounds
photostabilization mechanisms of hindered amine light stabilizers: interaction of singlet and triplet anthracene with piperidene model compounds, 239
Polymers
electronic absorption and fluorescence spectra of xanthene dyes in polymers, 41
Poly(vinyl alcohol)
spectroscopic properties and photodimerisation of water soluble poly(vinyl alcohol) modified with pendant (E)-2-[*p*-formylstyryl]-3,4-dimethyl-thiazolium methyl sulphate groups: polymer and model chromophore studies, 227
Potassium octacyanomolybdate(IV)
photoexcitation of potassium octacyanomolybdate(IV) with 1,10-phenanthroline and 2,2′-bipyridyl: kinetics and mechanism of the reaction in acidic medium, 147
Pulse radiolysis
studies of the triplet state of biphenyl derivatives by nanosecond pulse radiolysis, 337
Pyrryl substituted fulgides
absorption spectra and photoisomerization kinetics of photochromic pyrryl fulgides, 309

Quenching
$Cr(bpy)_3^{3+}$-sensitized photo-oxidation of phenol in aqueous solution, 115

Rhodamine B
energy transfer excitation in an N_2-laser-pumped coumarin 485-rhodamine B dye mixture through optical gain characteristics, 77
Riboflavin
photoelectrochemical (PEC) cell: riboflavin–Na_2EDTA system as an actinometer, 395
Rose bengal
photodegradation of visible-light-absorbing organic compounds in the presence of semiconductor catalysts, 389
Ruthenium aminopolycarboxylate
photocatalytic reduction of molecular nitrogen to ammonia catalysed by dinitrogen complexes of ruthenium aminopolycarboxylates, 137

Semiconductor catalyst
photodegradation of visible-light-absorbing organic compounds in the presence of semiconductor catalysts, 389
Singlet excited state
fluorescence quenching of *N*,*N*-bis(2,5-di-*tert*-butylphenyl)-3,4:9,10-perylene-bis(dicarboximide) (DBPI) by Co^{2+} ion, 51
Singlet molecular oxygen
reaction of singlet molecular oxygen with tetramethyl-*o*-xylylene, 255
Singlet oxygen
$Cr(bpy)_3^{3+}$-sensitized photo-oxidation of phenol in aqueous solution, 115

singlet oxygen quenching by tertiary alkyl ethers, 343
Solar radiation
high temperature UV absorption characteristics of three environmentally sensitive compounds, 353

Tetramethyl-*o*-xylylene
reaction of singlet molecular oxygen with tetramethyl-*o*-xylylene, 255
Thermolysis
insertion of phenylchlorocarbenes in the C–H bonds of alkanes: measurement of the rate constants by laser flash photolysis, 97
Thiuram disulphide
dithiocarbamate radicals in laser flash photolysis of thiuram disulphide and dithiocarbamate anion: calculation of optical spectra, 299
Triplet characteristics
studies of the triplet state of biphenyl derivatives by nanosecond pulse radiolysis, 337
Triplet–triplet absorption
triplet–triplet absorption and phosphorescence of aminodiazines, 35
Tungstates
photoactivity of isopoly molybdates and tungstates: a comparison, 107
Two-photon absorption spectroscopy
direct observation of the $2.^1A_g$-electronic state of carotenoid molecules by consecutive two-photon absorption spectroscopy, 59

Uranyl nitrate
photochemical reaction between uranyl and azulene, 279
UV Absorption
high temperature UV absorption characteristics of three environmentally sensitive compounds, 353

Vanadium
nitrogen photoreduction by vanadium(III)-substituted hydrous ferric oxide, 131
3-Vinyl-phenyl-azosulphonate
wavelength-dependent photolysis of 3-vinyl-phenyl-azosulphonate, 205
Viscosity independence
viscosity independence of the ratio of fluorescence lifetimes and quantum yields of ω-substituted 4-dimethylamino-trans-styrenes, 185

Water
photocatalytic splitting of water, 375

Xanthene dyes
electronic absorption and fluorescence spectra of xanthene dyes in polymers, 41
